

KEY INFORMATION DOCUMENT

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product: Currency CFD

Investment firm: iCFD Ltd, tel. +35725204600, website: www.vestle.com

Licensed by: the Cyprus Securities and Exchange Commission (CySEC), License no. 143/11

You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

This investment product is a Contract for Difference (CFD). A CFD is an Over the Counter (OTC) leveraged financial instrument, the value of which is determined based on the value of an underlying asset. The client makes a profit or a loss on the CFD based on the direction chosen (Buy or Sell) and the direction of the value of the underlying asset. The amount of profit or loss is determined based on the value of the underlying asset at the opening of a deal and its value at closing of the deal. The CFD is settled in cash only and the client has no rights whatsoever on the actual underlying asset.

The objective of the CFD is to profit from changes in the price of the underlying asset. In the case of currencies, such prices are determined in interbank transactions whereby banks will quote each other prices of one currency against another currency ("**Currency Pairs**"). iCFD obtains such prices from its liquidity provider, which in turn obtains such prices from market data aggregators that collect data on interbank transactions to produce a market price for each currency against another currency. The market for most currencies is open 24 hours a day, 5 days a week from Sunday at 23:00 CET until Friday 22:00 CET. For specific trading hours please check iCFD's website.

This product is intended for clients who wish to make directional transactions and take advantage of short term price movements on the underlying contract/commodity and have the ability to sustain the risk of loss of their entire invested amount within a short period of time. Therefore, this product is not appropriate for clients who cannot afford to lose their amount invested. In order to succeed in this type of investment, the client should make educated assumptions (and for this purpose may use the tools made available to it by iCFD) on the direction that the price of the underlying asset will go, and should follow closely the rates, as those may change rapidly within a short period of time.

In order to open a deal on a CFD instrument, the client must have sufficient margin ("**Margin**") in its account. The available initial margin required for major currency pairs¹ is 3.33% (representing leverage of 30:1), and 5% for all other currency pairs² (representing leverage of 20:1). This means that in order to open a deal of 10,000 EUR (deal size), the client would need to have a minimum available Margin of 333 EUR in its account.

The profit or loss is determined according to the following formulae:

For Buy (Long) positions: Deal size (in units of base asset) x [Close Bid – Open Ask] = P/L (in units of the other asset)

For Sell (Short) positions: Deal size (in units of base asset) x [Open Bid – Close Ask] = P/L (in units of the other asset)

The P/L from the closed positions is then converted into the base currency of the client's account, if different. This is done on the basis of the relevant Bid/Ask rate of the two currencies at the time the position is closed.

The P/L is also affected by the fees charged by iCFD, as detailed below.

The P/L is calculated by, and shown on, the trading platform on a continuous basis, and losses on the positions will affect the client's margin. Due to the European Securities and Market Authority (ESMA) Margin Close Out Rule ("**Margin Protection**"), all client's positions will be automatically closed once the available funds in the client's Equity are equal to or fall below 50% of the Used Margin for all open deals (50% of the Used Margin = Maintenance Margin). The unrealized profits in the open positions shall be used to support the losing positions in the client's account. In case the client has set a Stop

¹ A currency pair composed only of any two of the following currencies: USD, EUR, JPY, GBP, CAD and CHF.

² A currency pair composed of at least one currency which is not considered as a major one.

Loss Order on its open position/s, these open positions will be automatically closed upon either reaching the position's Stop Loss Order values, or reaching the mandatory Margin Protection, whichever takes place first. Therefore, it is important at all times to maintain the required level of margin to support the client's open positions.

What are the risks and what could I get in return?³

This risk indicator assumes that you keep the product for up to 24 hours. You may not be able to close the deal easily or you may have to end at a price that significantly impacts the return on your investment. CFDs may be affected by slippage or the inability to close a deal at the desired price due to unavailability of such price in the market. CFDs are OTC products and cannot be sold on any exchange, MTFs or other trading venue.

This product is a high risk product. Currencies may fluctuate significantly over a short period of time. If the change in price is against the direction chosen by the client, then the client could experience significant losses over a short period of time up to a maximum amount of the total investment in the client's account (including client's deposit(s) as well as any accumulated profits). However, the client will never owe iCFD any amount in excess of the available funds in the account due to iCFD's "Negative Balance Protection". On the other hand, should the change in price be the same as the direction chosen by the client, then the client may see significant profits over a short period of time.

Profits and losses are exacerbated by the level of leverage used. Higher leverage ratios result in higher profits if the client chose the correct direction, and higher losses if the direction went against the client.

Performance Scenarios (assuming no Overnight Financing and Slippage effects):

Below are examples of performance scenarios of a CFD deal based on EUR/USD.

Used Margin in EUR	Leverage	Maintenance Margin in EUR	Deal Amount in units of base asset	EUR/USD Opening Deal Rate	Deal Amount in USD	Deal Direction	Change in Price	EUR/USD Closing Deal Rate	P/L Amount in USD	EUR/USD Spread in Pips	P/L Exchange Rate to EUR (Conversion Spread = 0.0001)	P/L Amount in EUR under Margin Protection
333	30	166.5	10,000	1.25	12,500	Buy	5%	1.3125	625	2	1.3126	476.15
333	30	166.5	10,000	1.25	12,500	Buy	1%	1.2625	125	2	1.2626	99
333	30	166.5	10,000	1.25	12,500	Buy	0%	1.25	0	2	0	-
333	30	166.5	10,000	1.25	12,500	Buy	-1%	1.2375	-125	2	1.2374	-101.02
333	30	166.5	10,000	1.25	12,500	Buy	-5%	1.1875	-625	2	1.1874	-166.5 ⁴
333	30	166.5	10,000	1.25	12,500	Sell	5%	1.3125	-625	2	1.3124	-166.5 ⁴
333	30	166.5	10,000	1.25	12,500	Sell	1%	1.2625	-125	2	1.2624	-99.02
333	30	166.5	10,000	1.25	12,500	Sell	0%	1.25	0	2	0	-
333	30	166.5	10,000	1.25	12,500	Sell	-1%	1.2375	125	2	1.2376	100
333	30	166.5	10,000	1.25	12,500	Sell	-5%	1.1875	625	2	1.1876	526.27

³ The figures do not take into account your personal tax situation, which may also affect how much you get back.

⁴ Due to Margin Protection all open positions will be closed automatically upon reaching 50% or less of the client's Used Margin.

French residents only – In accordance with AMF requirements, all CFDs have intrinsic protection. Therefore, open positions will be closed automatically upon either reaching the intrinsic protection level, or reaching the Margin Protection level, whichever takes place first.

What happens if iCFD is unable to pay out? In the event that iCFD becomes insolvent and is unable to pay out to its clients, retail clients may be eligible to compensation of up to 20,000 EUR by the Investor Compensation Fund set up by the Cyprus Securities and Exchange Commission.

What are the costs? iCFD charges a spread when a client buys a CFD. A spread is the difference between the Sell (“Bid”) and Buy (“Ask”) price of the CFD which is multiplied by the deal size. The spread per each underlying asset is detailed on iCFD’s website but each client may have different spreads on all or some of the underlying asset based on the client’s history, volume, activities or certain promotions.

For the purpose of the example we will assume a 10,000 EUR transaction in EUR/USD with a 2 pips spread. EUR/USD pip is the 4th decimal digit (0.0001). 10,000 EUR x 0.0002 = 2 USD

The amount of 2 USD will be deducted from the P/L upon opening the transaction and therefore immediately after opening the transaction the P/L of that transaction will be -2 USD.

In addition to the above, iCFD charges Overnight Financing (OF) for deals that remain open at the end of the daily trading session. This OF may be subject to credit or debit, calculated on the basis of the relevant interest rates for the currencies in which the underlying instrument is traded, plus a mark-up. The mark-up for currency pairs is 0.75%.

If the calculated OF Percentage is positive, it means that an applicable amount will be added (credited) to the client’s account. A negative OF Percentage means that an applicable amount will be subtracted (debited) from the client’s account. If the CFD’s quoted currency differs from the account’s currency, it will be converted to the account’s currency at the prevailing exchange rates.

Calculation of OF Percentage for Long Positions:

$$\text{Overnight Financing Percentage} = - \left(\frac{3M \text{ interest rate of the other currency} - 3M \text{ interest rate of the base currency} + \text{markup}}{360} \right)$$

Calculation of OF Percentage for Short Positions:

$$\text{Overnight Financing Percentage} = \left(\frac{3M \text{ interest rate of the other currency} - 3M \text{ interest rate of the base currency} - \text{markup}}{360} \right)$$

To reach the OF Amount, OF percentage (as calculated above) is multiplied by the deal amount (in units of the base asset), as indicated in the formula below:

Overnight Financing Amount = Deal Amount × Overnight Financing Percentage

How long should I hold it and can I take the money out early? CFDs on currency are usually held for less than 24 hours. You can cash out the CFD at any point you wish during trading hours, but it may not be at a price beneficial to you or your investment goals.

How can I complain? Complaints may be addressed to iCFD via email to complaints@vestle.com. The email should set out the client’s name, account number and nature of the complaint. If the client is unhappy with the Company’s response to its complaint, it may refer the complaint to the Financial Ombudsman of the Republic of Cyprus.
